

Recover your Okta org in minutes, not hours.

Recovery-first identity resilience for Okta teams, backup, diff, restore preview, and audit evidence. Built to complement Okta, not compete with it.

Okta is the front door to every system. One bad policy, group, app, or Workflow change can lock out a whole org, and most teams still recover from screenshots, tickets, and memory.

WHAT BUTTERFLY DOES

01

Backup

the tenant

02

Diff

show what changed

03

Preview

the restore

04

Prove

the outcome

WHAT IT COVERS

- **Okta core** Users · Groups · Apps · Policies · Auth servers · Schemas
- **Okta Workflows** Flow versions · Folders · Tables · Connector projects
- **Auth0** Recovery surface where relevant

EVIDENCE FOR

SOC 2

HIPAA

PCI DSS

NIST

ISO 27001

CIS

Let's set the pilot scope in 30 minutes.

One production tenant, one restore drill, one clear definition of done.
